1. 次の英文を読んで、下記の設問に答えなさい。

The famous Trans-Siberian railway line goes from \*Moscow to \*Vladivostok, but there's another railway line about 650 kilometers north of the Trans-Siberian. This is the 4000-kilometer \*Baikal-Amur Mainline (BAM). A special train, the \*Matvei Mudrov medical train, travels on it. There are usually between twelve and fifteen doctors on the train. The train stops for a day at places along the BAM. The people who live in small towns and villages come to the train for free medical treatment. There are no doctors or hospitals in their towns or villages. For these patients, their health center is on the [ 1 ].

The Matvei Mudrov was named after a Russian doctor in the nineteenth century. Nowadays, the Matvei Mudrov visits each town or village on the BAM twice a year. In the village of \*Khani (population 742), two patients are a man with two broken ankles and a teenage girl with stomach trouble. The patients like the doctors on the train. They say they are honest and good at their jobs.

The next stop is a town called \*Berkakit. About 4,000 people live there. There is a line of people who want to see the doctors. One patient is Mikhail. He's 61 years old, and he came to Berkakit in 1976. At the time, only about a hundred young people lived in Berkakit. It was a new town. Mikhail met a woman who worked at the town bakery. They married and stayed in the town. When he walks into the doctor's office, the doctor says 'Oh, Mikhail, I \*recognized your voice.' Mikhail has a problem with his shoulder. The doctor writes a letter to say that he can't work, and he must have an \*operation. He leaves, and then he returns a few minutes later. He brings freshly cooked pies and some goat's milk.

For the people who live in this \*remote part of Russia, the Matvei Mudrov is more than a medical train. It's [ 2 ] to the community of their country.
